

Responses to Questions Received
RFP No. 2015-ERC-001
July 15, 2015

Question 1: Tablets: RFP states that the ERC Team will provide android tablets for the survey. COMPANY NAME bought a week ago around 40 latest tablets (Samsung Tab4) and accessories (external batteries, solar chargers, etc). We were wondering if you will consider using it?

Response to Question 1: ERC currently has 30 android devices in country. If we determine that we need to field a team larger than 30 for the Land Afar data collection effort, we will certainly consider renting the additional tablets.

Question 2: Software: RFP mentions that ODK is chosen software and ERC team will be responsible for the following. COMPANY NAME has ample programming experience in ODK and its upgrade - Survey CTO. We were wondering if you will consider using the internal capacity on that?

Response to Question 2: We have a dedicated field manager/country coordinator who specializes in survey programming. While our field manager will be responsible for programming the surveys, we would like you to include information on your experience with software and programming, electronic data management, server and electronic data uploading or syncing processes in your proposal. The selected firm will be responsible for data management in the field.
